GOAL

Collaborate with businesses on deploying a well-architected cloud infrastructure and natively enable DevOps practices in their application lifecycle, so they have the solid foundation they need to focus on driving customer value by default.

COVER LETTER

DevOps-oriented Cloud Engineer, Consultant, and Technical Writer. Almost 4 years of experience in customer facing Cloud and DevOps roles at AWS, IBM, and Caylent. 4x AWS certified, Bachelor of Computer Engineer, and studying IT for the past 12 years.

As an Engineer, I help businesses deploy a well-architected cloud infrastructure and natively enable DevOps practices in their application lifecycle. My goal is to build together the solid foundation businesses need to focus on driving customer value by default. So all they have to do is Push their code & watch it Roll towards continuous innovation.

As a Writer, I've always loved digesting complex ideas into core principles and expressing them with words. My goal is to leverage my technical experience in IT to provide content and documentation that are uncomplicated, informative, and straight to the point.
